

SOMIC 434

somic
Engineered to perform

THE RENOWNED **SOMIC 434**

HIGH-END IN EVERY ASPECT

For maximum performance and variety in individual packaging solutions

Flexibility along the entire line – widespread options for your cardboard packaging

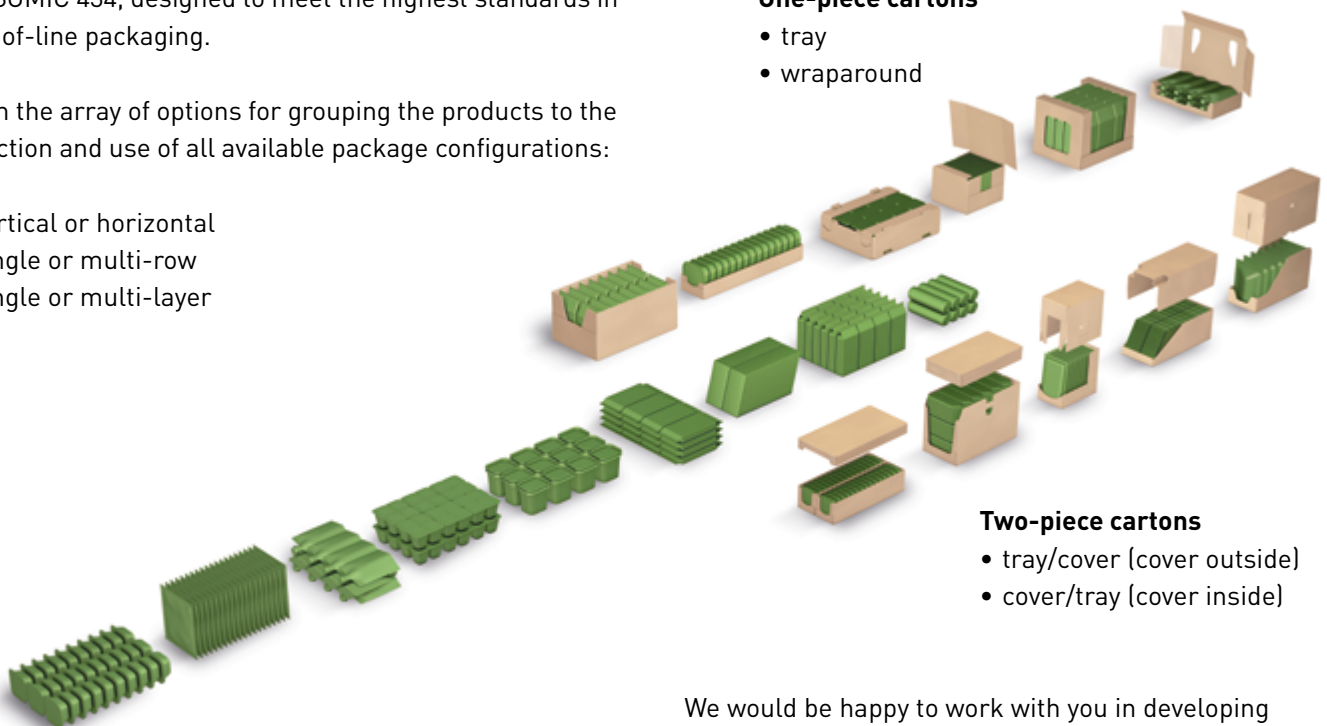

For 50 years, SOMIC has stood for high-tech packaging engineering. All this experience has been drawn upon to develop the SOMIC 434, designed to meet the highest standards in end-of-line packaging.

From the array of options for grouping the products to the selection and use of all available package configurations:

- vertical or horizontal
- single or multi-row
- single or multi-layer

One-piece cartons

- tray
- wraparound

Two-piece cartons

- tray/cover (cover outside)
- cover/tray (cover inside)

We would be happy to work with you in developing a packaging concept that is tailored to your specific requirements.

Quality “Made in Germany”

SOMIC combines competence and expertise in cardboard packaging. From development and the in-house production of high quality components through to extensive testing of the finished machine with original products: SOMIC offers maximum reliability during every project phase. Visit us and see for yourself!

You want your products to be displayed in an attractive manner? We have the customised cardboard packaging you need

The SOMIC 434 packs your products quickly and reliably in secure shipping cardboards and cartons. When they arrive at the retailer, the goods are attractively displayed on the shelves with the lids removed. We are the experts for a wide range of packaging tasks. Our cartoning machine produces secondary packaging for:

- flat sachets, stand-up pouches
- paperboard cartons
- cans, cups, dishes
- jars, bottles, tubes
- blister packs

Thanks to a well-thought-out concept that is technically perfectly implemented, we ensure that until they reach end customers at the point of sale, your products

- are reliably and hygienically protected
- can be easily and securely transported
- are professionally displayed on the retailer's shelf with strong branding

This ensures that only sustainable and recyclable materials are used for the cardboard packaging and that it is very easy for everyone involved to handle.

Your all-round carefree package: Because you can always rely on SOMIC

Our commitment to the highest level of reliability and performance does not end with the installation of your SOMIC packaging machine. Our experts are here for you throughout the entire lifetime of the machine. This guarantees the highest performance in daily use.

This commitment ensures our solution targets all quality-conscious industries with individual packaging requirements: from the food, pet food, and health care sectors to many other demanding non-food products. The flexibility of our packaging machines enables us to adapt to changing market requirements at all times.

The complete SOMIC service package:

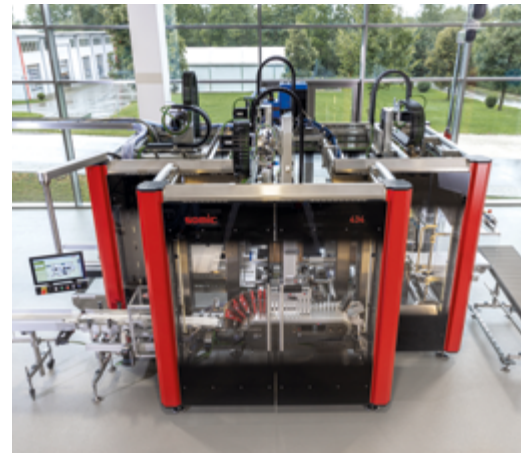

- Digital services for equipment diagnostics and remote maintenance
- Global support provided by qualified service technicians
- Express spare parts service and online documentation
- Prompt and competent on-site customer service
- Training programs for operators and technicians
- Expert team for functional enhancements and new formats

Shelf-ready case packaging from the experts

SOMIC 434 – One machine for all packaging tasks

The SOMIC 434 is the solution for a wide range of automated packaging requirements. Its performance set the standard for the production of shelf-ready cartons for a wide range of industries. We ensure that your products arrive safely at the retailer and are attractively displayed at the point of sale. Whether it's food, beverages, cosmetics or other consumer goods, the SOMIC 434 offers flexible solutions for end-of-line packaging. Based on the current conditions and circumstances of your production, our specialists will devise the best possible solution for your needs. Regardless of whether you want to pack your products in tray cartons, wraparound cartons or tray/cover cases, the SOMIC 434 can meet nearly any packaging requirement.

For single-component, open cardboard packaging

SOMIC 434 T Tray Packer

The SOMIC 434 T Tray Packer packs pre-packed products in single-component, open-top display packs. Trays ensure the space-saving transport of products. They are also extremely resource-efficient. The tray packer can accommodate different carton thicknesses and materials and additional options such as support strips or a cardboard edge.

Initially, the products are arranged in the collecting and grouping unit according to the customer's requirements. In the second step, the products are positioned on the flat blank, which is then folded and glued around the folding head to protect the product.

The following carton types can be produced on the SOMIC 434 T:

- Trays
- Trays with stacking function

Output range of the SOMIC 434 T Tray Packer:

Cartoning capacity

Up to 32 (trays)/min.

These figures are indicative and non-binding as they depend on various sizes and characteristics (product/blank/carton material).

For single-component, closed cardboard packaging

SOMIC 434 W Wraparound Packer

The SOMIC 434 W Wraparound Packer is used to package pre-packed products in single-component, closed cases. Wraparound cases are durable and ensure that goods are transported safely to the retailer. The carton can be conveniently opened by means of a perforation and the product can be attractively displayed at the point of sale.

The arranged products are fed into the machine individually, collected and grouped. The group is then safely transported onto the flat blank. The blank is folded around the folding head before the cover flap is closed and hot glued in the final step.

The following carton types can be produced on the SOMIC 434 W:

- Trays
- Trays with stacking function
- Wraparound cartons
- Display cartons
- Corrugated cases

Output range of the SOMIC 434 W Wraparound Packer:

Cartoning capacity

Up to 32/ 32 (trays/wraparound cartons)/min.

These figures are indicative and non-binding as they depend on various sizes and characteristics (product/blank/carton material).

Multi-component, closed cardboard packaging (cover inside)

SOMIC 434 DT Cover/Tray Packer

The SOMIC 434 DT Cover/Tray Packer is used for two-part packaging concepts. This machine produces a perfect looking, shelf-ready tray carton that can be displayed directly on the shop shelf once the cover is removed. It can be used to accommodate a wide variety of product shapes and carton requirements.

In the first step, the products are collected and grouped before the cover is folded and glued around the product group arrangement. In a third step, the product group and cover are positioned on the flat tray blank, where the tray carton is assembled and glued with hot glue to the cover.

The following carton types can be produced on the SOMIC 434 DT:

- Trays
- Cover/tray packaging (cover inside)

Output range of the SOMIC 434 DT Cover/Tray Packer:

Cartoning capacity

Up to 30/25 (trays without covers/trays with cover inside)/min.

These figures are indicative and non-binding as they depend on various sizes and characteristics (product/blank/carton material).

Multi-component, closed cardboard packaging (cover outside)

SOMIC 434 TD Tray/Cover Packer

The SOMIC 434 TD Tray/Cover Packer has been developed for two-part packaging designs and gives the customer plenty of freedom. The products are first placed in a tray and then covered. This is also referred to as an outer cover. It can be used to accommodate a wide variety of product shapes and carton requirements.

Initially, the products are arranged in the collecting and grouping unit according to the customer's requirements. The tray carton is then gently assembled around the folding head before the cover blank is folded around the filled tray and the carton is closed.

The following carton types can be produced on the SOMIC 434 TD:

- Trays
- Tray/cover packaging (cover outside)

Output range of the SOMIC 434 TD Tray/Cover Packer:

Cartoning capacity

Up to 32/30 (trays without covers/trays with cover outside)/min.

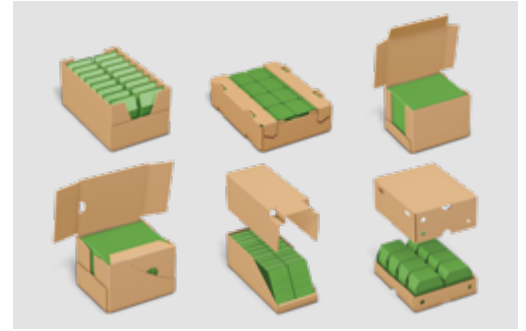

These figures are indicative and non-binding as they depend on various sizes and characteristics (product/blank/carton material).

Single-component or multi-component, open or closed cardboard packaging (cover inside)

SOMIC 434 DTW Cover/Tray/Wraparound Packer

The SOMIC 434 DTW Cover/Tray/Wraparound Packer can accommodate single- or multi-component shelf-ready cartons and ensures maximum flexibility. Almost all carton types can be accommodated on this machine in accordance with the customer's requirements.

Open-top tray cartons, closed wraparound cases or multi-component cardboard packs with inner cover protect the products for transport. It also ensures an attractive presentation at the point of sale.

The following carton types can be produced on the SOMIC 434 DTW:

- Trays
- Trays with stacking function
- Wraparound cartons
- Display cartons
- Corrugated cases
- Cover/Tray packaging (cover inside)

Output range of the SOMIC 434 DTW Cover/Tray/Wraparound Packer:

Cartoning capacity

Up to 30/25/25 (trays without covers/trays with cover inside/wraparound cartons)/min.

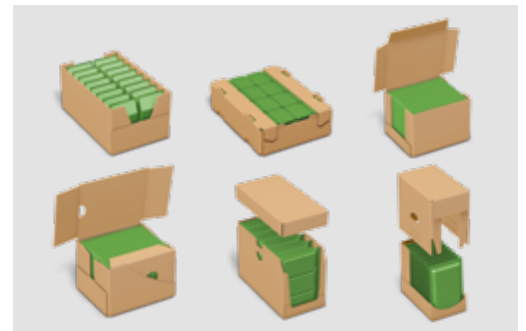

These figures are indicative and non-binding as they depend on various sizes and characteristics (product/blank/carton material).

Single-component or multi-component, open or closed cardboard packaging (cover outside)

SOMIC 434 TDW Tray/Cover/Wraparound Packer

The SOMIC 434 TDW Tray/Cover/Wraparound Packer can accommodate virtually any cardboard packaging type. This machine is particularly suitable when different carton concepts are to be accommodated on one packaging system. Depending on the format, an open-top tray carton, a closed wraparound case, or a multi-component carton with an outer cover can be produced.

This means the products are optimally protected for transport and can be attractively displayed in retail.

Folgende Kartonarten können auf der SOMIC 434 TDW hergestellt werden:

- Trays
- Trays with stacking function
- Wraparound cartons
- Display cartons
- Corrugated cases
- Tray/cover packaging (cover outside)

Output range of the SOMIC 434 TDW Tray/Cover/Wraparound Packer:

Cartoning capacity

Up to 32/30/25 (trays without covers/trays with cover outside/wraparound cartons)/min.

These figures are indicative and non-binding as they depend on various sizes and characteristics (product/blank/carton material).
