

HIGH-TECH PACKAGING MACHINES

COMPLETE SOLUTIONS FOR INDIVIDUAL
WRAPAROUND CORRUGATED OR
CARTON END-OF-LINE PACKAGING

We solve your specific packaging task – competent, well-thought-out and responsible

Our modern life is hardly imaginable without corrugated secondary packaging. Light, hygienic, stable, and sustainable – it ensures retailers' households and businesses are reliably supplied with all kinds of goods.

As a leading provider of shelf-ready packaging machines and line technology for complete end-of-line automation solutions, we make an essential contribution to this. We thereby ensure the high-quality presentation of your products on shop shelves.

SOMIC machines are suitable for a variety of different goods and a diverse range of desired carton shapes and formats. They meet the strict criteria of the food industry, pet food and pharmaceutical sectors as well as many other demanding non-food sectors.

Since every product and market has its own characteristics, we also configure the packaging machine accordingly. Your products are securely packaged and optimally displayed according to your exact quality and performance requirements.

We provide competent advice throughout the entire process: from line integration, product handling and grouping to the individual carton blanks.

As a family business, we think and act responsibly – far beyond the recycled cardboard material and the longevity of our machines. In line with our sustainability concept, we are committed to the careful use of energy and raw materials. Furthermore, we take ecological and economic aspects into account for future generations.

Benefit at all levels – from our passion for technology and perfection

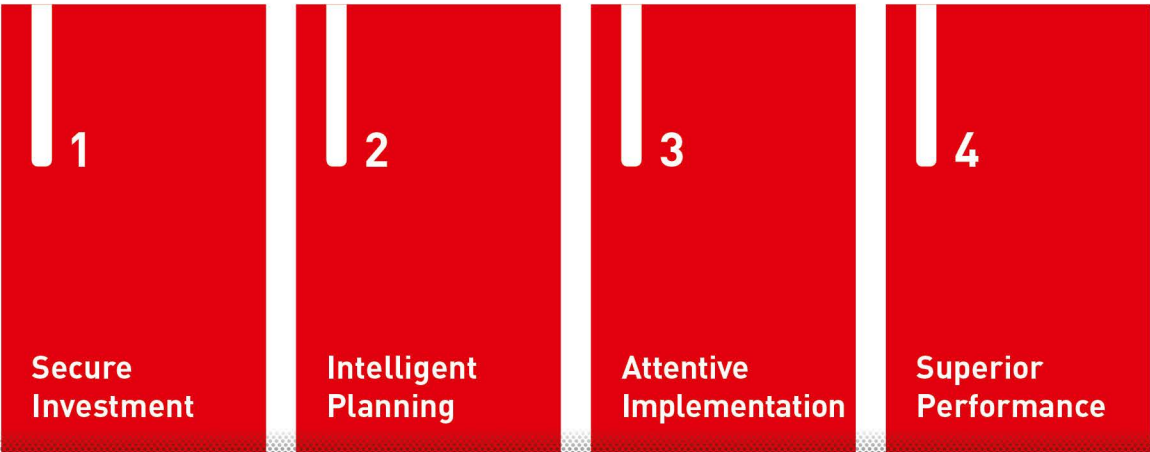

Our 50 years of experience in the development and production of packaging machines is best expressed by our slogan „Engineered to perform“. Because the entire company is committed to this value proposition: from top management to our numerous junior employees, who are trained in various future-proof disciplines.

Highly qualified through continuous training, our team ensures that our customers can rely on our proficiency during every phase of the project. The end result is a solution that impresses on an economical and technical level. For years to come.

Our approximately 500 employees are united by their love of technology and pride in building extraordinary packaging machines.

Four red columns symbolize our comprehensive quality promise:
SOMIC reliability at every stage

Quality and engineering “Made in Germany” – proven and highly valued all over the world

SOMIC machines can be adapted to any requirement. That is why well-known global brands and medium-sized companies in various regions of the world rely on our expertise to fulfil their individual packaging needs.

Our „Made in Germany“ engineering spirit is based on continuous improvement and innovation with a clear focus on customer value. In this way, you benefit from the unique combination of reliable performance, exceptional ease of use, small dimensions, and maximum operational efficiency.

Our patented RealSource Simulation ensures the highest level of planning security right from the early stages of the development phase by virtually testing the 3D construction models of our machines with the original control. Thanks to our own high level of vertical integration, the use of premium components and the obligatory factory acceptance tests – performed using our customers’ original products – we ensure this value proposition is upheld throughout many years of operation.

With our headquarters in Amerang, the nearby parts production in Haag i. Obb., as well as our other locations in Eagan, Minnesota (USA) and in Bangkok (Thailand), we have a global presence in all economic areas and can satisfy customer expectations promptly and directly on site.

Performance far beyond the machine – comprehensive service for optimum availability

Our commitment to the highest level of reliability and performance does not end with the production and provision of a technically perfect solution. Our experts are here for you: from the packaging concept to commissioning, inspections, and maintenance work through to comprehensive after-sales services.

Personal helpdesk support

For qualified assistance with all questions, our competent employees can be reached by phone and email for

- fast and effective troubleshooting
- advice on all technical issues
- establishing contact to suitable experts from specialist departments or initiating further measures

Short notice spare parts service and online documentation

We offer you:

- an electronic spare parts catalogue and documentation for your machine via SOMIC website
- an extensive range of spare parts at our locations in Germany and the USA
- short notice, in-house manufacturing of production parts
- fast delivery as well as courier service in emergencies
- long-term availability
- repair service and reconditioned spare parts

Comprehensive training programmes

The optimum and trouble-free use of your SOMIC packaging machine is ensured by trained staff and practical experience by means of

- standardized training packages for users and technicians
- training documents created specifically for your machine
- training aided by simulation software so as not to disturb operation of the machine or as online training

Global system diagnosis and remote maintenance

Our packaging machines are equipped with a secure industrial VPN router and a license for remote maintenance. This allows:

- remote diagnosis and troubleshooting with a solution guide
- software updates and a parameter backup
- the examination and optimisation of settings

Our complete SOMIC service package ensures maximum production reliability and smooth operation.

Fast and competent customer service on site

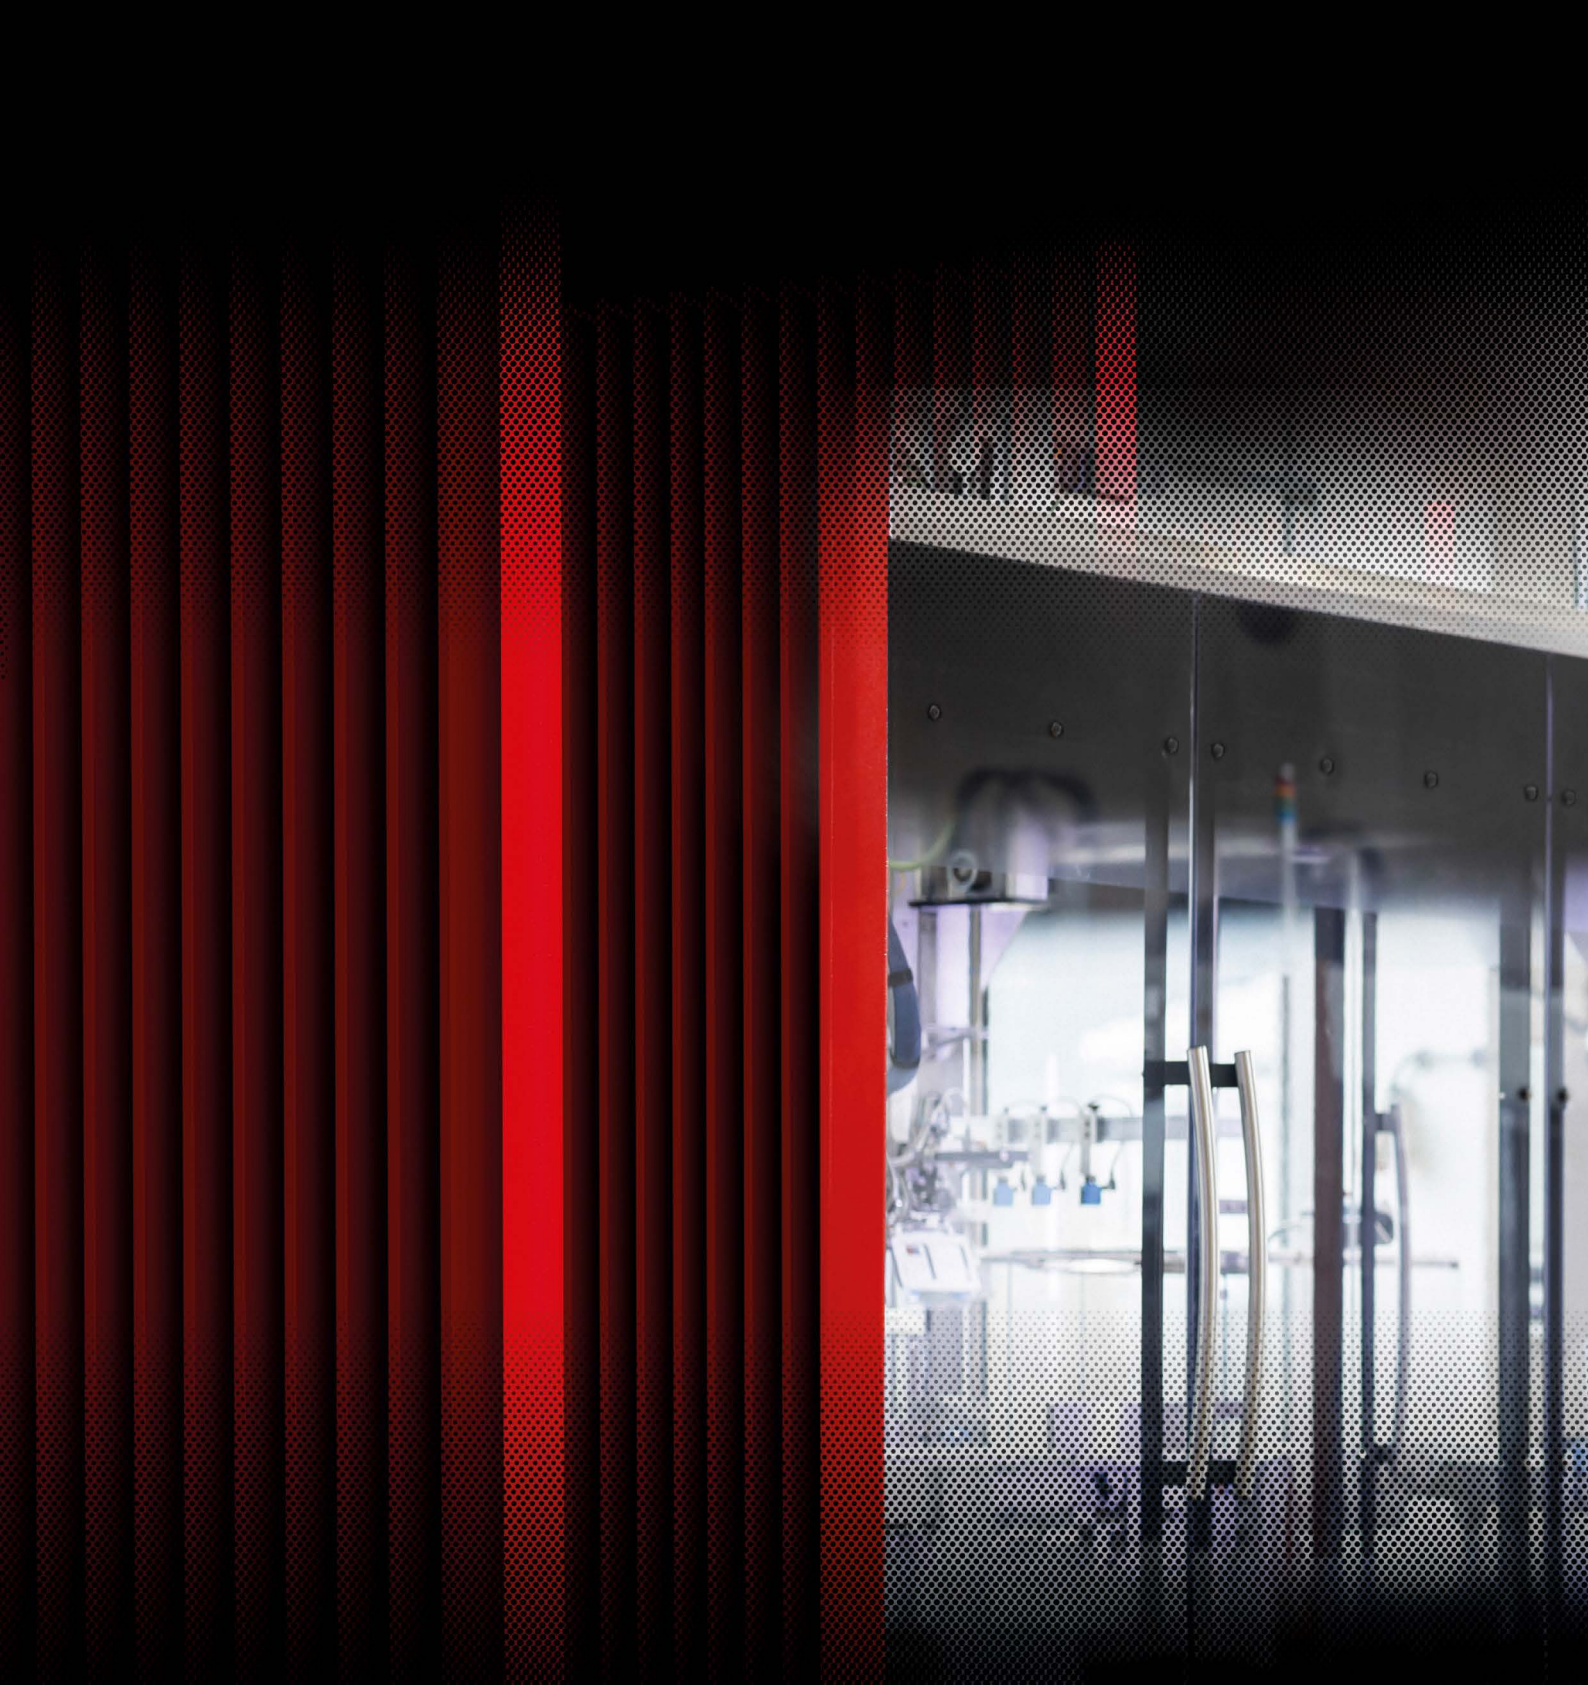

Experienced and competent service and commissioning technicians are quickly on site to help with

- installations, modifications, extensions, and relocations
- inspection and maintenance work
- repair work
- optimizing your packaging machine or adjusting changed product features

Extended functions and new formats

SOMIC packaging machines can be extended and adapted to changing market conditions. For this we offer

- an independent team with technical sales, system experts, design engineering and project managers
- a detailed feasibility check on the 3D model
- the simulation of new formats
- assurance of the longevity of your machine
